Sharmila Dongari

sdongari24@gmail.com | 943-238-4699 | linkedin.com/in/sharmiladongari | github.com/sharmilad24 | sharmilad24.github.io | Atlanta, GA

Education

Georgia State University Atlanta, GA

Bachelor of Science in Computer Science *Expected May 2028*

- **Relevant Coursework:** Probability and Statistics, Data Structures, Discrete Mathematics, AI and Machine Learning, System Level Programming

Experience

Weyerhaeuser Seattle, WA

Data Analyst Intern *May 2026 – July 2026*

- Developed dbt-based ELT models using Snowflake, dbt Cloud, VS Code, and GitHub to transform and govern SAP S/4HANA and enterprise data, delivering a 12-table Power BI semantic model with 9 relationships and 6 reusable DAX measures that supported enterprise reporting and analytics
- Performed exploratory data analysis and cleansing on Snowflake data, validating 838,400 material plant data combinations across 252 plants and automating a 4 hour manual reporting process into 15 minutes

Georgia State University, Assistive Navigation Lab Atlanta, GA

Undergraduate Researcher, advised by Dr. Hemanth Venkateswara *May 2026 – Present*

- Applied machine learning to design and evaluate an A-star path planning and obstacle avoidance framework in Python, analyzing model results across 50+ randomized spatial environments
- Built evaluation frameworks measuring model effectiveness across 4 performance metrics, collision rate, path length, replanning frequency, and execution time, supporting research toward a real time assistive device for blind and low vision users

BlueCloud Digital Core Irving, TX

Cloud Computing Intern *Aug. 2023 – May 2024*

- Completed hands on training in Amazon Web Services (AWS), developing foundational knowledge of cloud infrastructure, compute, storage, networking, security, and identity management
- Prepared for and earned the AWS Cloud Practitioner certification through structured labs and technical exercises focused on deploying and managing cloud resources

Projects

MARTA Transit Reliability and Trip Planner | *Python, SQL, Scikit-learn, Streamlit, Power BI, SQLite* June 2026

- Engineered a data pipeline extracting live MARTA rail data every 2 minutes into SQLite, accumulating 30K+ records, and trained a Random Forest model forecasting train delays with a mean absolute error of 78 seconds, a 20 percent improvement over baseline
- Deployed a Streamlit trip planner and Power BI dashboard translating machine learning results into actionable insights for stakeholders

Job Market Analytics Dashboard | *Python, SQL, Pandas, Scikit-learn, Streamlit, Plotly, REST API* 2025

- Built an end to end data pipeline extracting 300+ job postings via the Adzuna REST API, cleansing and engineering 15+ skill features to train a Random Forest classifier predicting role seniority with 67.8 percent accuracy
- Analyzed machine learning results to surface an 80,000 dollar senior to junior salary trend and deployed an interactive dashboard measuring hiring pattern effectiveness across roles

Real Time Stock Market App | *Python, WebSocket API, Streamlit, Pandas, Excel* June 2026

- Built a real time market data ETL pipeline via WebSocket API, extracting and processing financial data across 15+ tickers to support forecasting and performance monitoring
- Designed analytical dashboards measuring portfolio risk exposure and performance attribution, with Excel compatible exports for business reporting

Leadership and Community

NASA L'SPACE Mission Concept Academy (MCA) September 2026 – Present

Program Analyst

- Serve on the Programmatics subteam tracking risk, cost, and schedule baselines and supporting requirements analysis toward Mission Definition Review and Preliminary Design Review milestones for a 20 member mission concept team

Progsu, Georgia State University Programming Club 2026 – Present

- Active member of a 1,500+ member builder community, participating in technical workshops and Hacklanta, its flagship hackathon

Certifications and Activities

Certifications: Microsoft Power BI, TensorFlow ML, AWS Cloud Essentials, SQL, Databricks Fundamentals
Activities: Bloomberg Market Concepts, Forage | JPMorgan Chase Software Engineering Job Simulation, Forage
Open Source: Last Voyage, a BSD-3-Clause licensed Reddit hackathon game built with TypeScript, Redis, and Devvit

Technical Skills

Languages: Python, SQL, Java, JavaScript, TypeScript, R, C, HTML
Machine Learning and Forecasting: Scikit-learn, PyTorch, TensorFlow, Random Forest, Predictive Modeling, Statistical Modeling, Feature Engineering, Model Evaluation
Cloud and Data Engineering: AWS, Snowflake, dbt Cloud, GitHub, SQLite, ETL Pipelines, Data Cleansing, Exploratory Data Analysis, API Integration, Data Governance
Data Visualization and Business Tools: Power BI, Plotly, Streamlit, Advanced Excel, Microsoft Office Suite
Professional: Analytical problem solving, cross functional collaboration, presentation and communication, attention to detail, time management
